Remote Solutions

Live video information makes the difference between hearing about events or seeing them unfold.

Titan Remote makes it possible to transmit high quality real time video efficiently over unmanaged networks, allowing visual coverage from many more locations than fixed CCTV solutions.

Part of the Titan Vision's integrated platform or as a stand-alone solution, Titan Remote allows real time video capture and delivery between both individuals and the Control Room.

Using existing GPRS, 3G or 4G mobile networks, Titan Remote is inherently more flexible and cost effective when compared to alternative options.

Transmission of live or recorded video from the remote or mobile location includes audio and alarm information plus GPS co-ordinates making, it ideal for the tracking and monitoring of mobile assets, lone workers or engineering and emergency response personnel.

Key Benefits

Reliable communications between remote locations or mobile devices and your command and control centre or other operational staff

Transmission of high quality video streams efficiently and effectively over unmanaged or managed networks

Dynamic switching between low and high bandwidth connections

Applications

- Critical Infrastructure
- Defence and Military
- Police & Law Enforcement
- Lone Worker Management
- Personal Safety Services
- Remote Field Operations
- Estate Management
- Engineering Support
